

# 2010 VS 2017 RATEABLE VALUES

WHO ARE THE REGIONAL **2017 REVALUATION** WINNERS AND LOSERS?  
ROLL OVER THE REGION TITLES BELOW TO FIND OUT.

These figures have been extracted from the Valuation Office Agency's (VOA) non-domestic rating statistics published on 18 October 2016 and are based on the average changes in rateable values within each individual Administrative area across England and Wales.

The extent of your change in rateable value will depend on the exact location of your property. Even if you are in an area where rateable values are set to fall, it is important to have your assessment verified, as there may still be opportunities to secure further reductions.

For a detailed analysis of your revised 2017 assessment and advice on what to do next, please contact a member of our Business Rates team.
